

Class Homework

1. <https://eburns1209.github.io/Crystal-Game/>

An app that involves clicking the 4 crystals one at a time, where the number given to the crystal at one time is unknown to the user, and they must try and reach the randomly generated number without going over. If you do go over, then you lose and the game restarts. The app was built with HTML, CSS, Bootstrap, JavaScript, and JQuery. Click the image to play the crystal game.

2. <https://eburns1209.github.io/trainScheduler-7/>

This app is a train schedule application that incorporates Firebase to host arrival and departure data. My app will retrieve and manipulate this information with Moment.js.

This website will provide up-to-date information about various trains, namely their arrival times and how many minutes remain until they arrive at their station.
