Sample Work

1. https://dry-tundra-19234.herokuapp.com/

   An app using react and components. I also deployed to Heroku. It is a very simple app, but it demonstrates my eagerness to learn new technology and show that I am up for new challenges.

2. https://averageathletesite.wordpress.com/

   An app that I originally built with handlebars and routes, but I am going to create again on wordpress.org, I was having difficulties with Heroku. Therefore, I want to keep the same concept, but try to create again on another site.
